OU PONT HOUSE PAINT (CLEANS ITSELF!)

JOUR HOUSE will always look fresh and white when Y painted with Du Pont House Paint. For dirt and grime don't become embedded—the rains just wash them away. The paint remains sparkling clean and new-

Self-Cleaning Du Pont House Paint is so formulated that, as time goes by, a microscopically fine white powder forms on the surface. Heavy rains wash the powder away, taking dust and dirt with it and leaving the surface clean and white again. Excessive accumulations of dirt (particularly in sooty industrial communities or in heavily shaded locations) and stains from copper screens may delay or interfere with this process. Because this "self-cleaning" is gradual, the wearing qualities of the paint film are not abnormally affected.

Available in white and popular tints, Self-Cleaning Du Pont House Paint is as durable as it is beautiful. It protects against rust, rot and decay—giving lasting beauty and protection. Yet it costs no more than other good paints. Call on a reliable painter for your painting jobs. He'll be glad to use Du Pont House Paint.
